

Revealed (t=30)

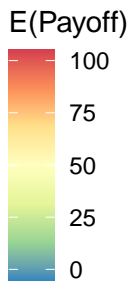

Revealed (t=30)

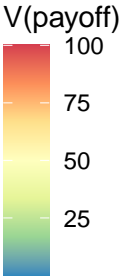

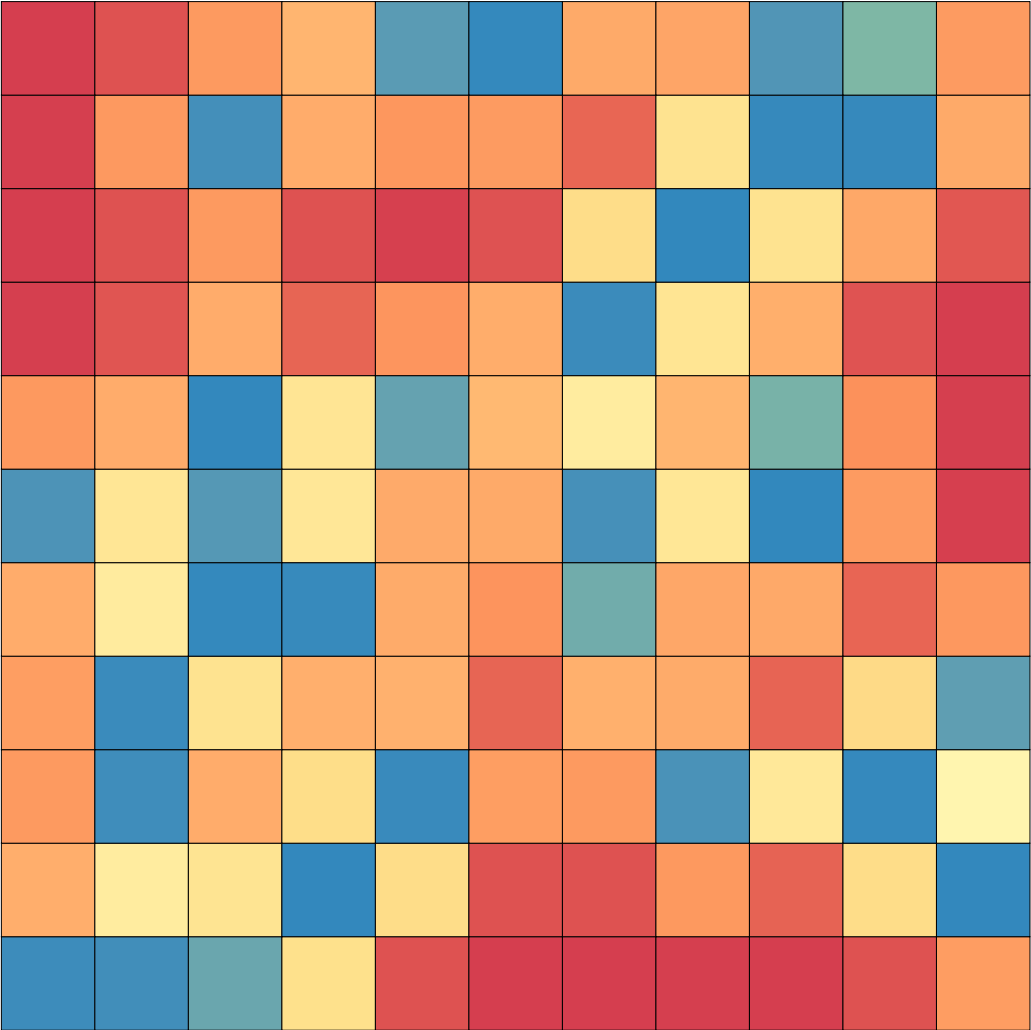

The heatmap displays a 12x12 grid of values. The color scale is as follows:

- Light Yellow: Low values (approx. 0.0 to 0.2)
- Yellow: Low to medium values (approx. 0.2 to 0.4)
- Orange: Medium values (approx. 0.4 to 0.6)
- Red: High values (approx. 0.6 to 0.8)
- Dark Red: Highest values (approx. 0.8 to 1.0)

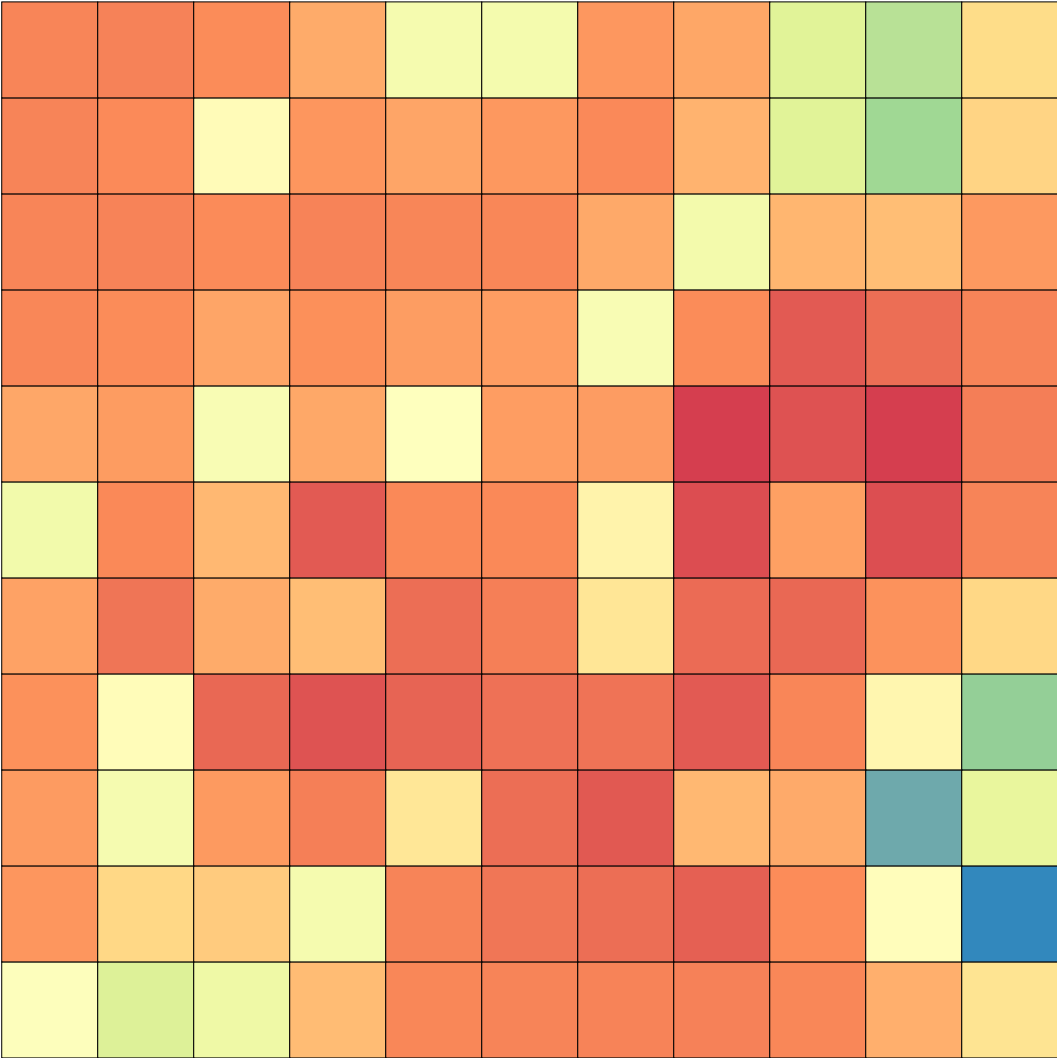

The visualization shows a clear trend where values increase from the top-left towards the center-right of the grid, peaking in the red and dark red regions, and then decreasing towards the bottom-right.
