

Revealed (t=30)

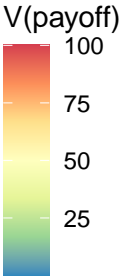

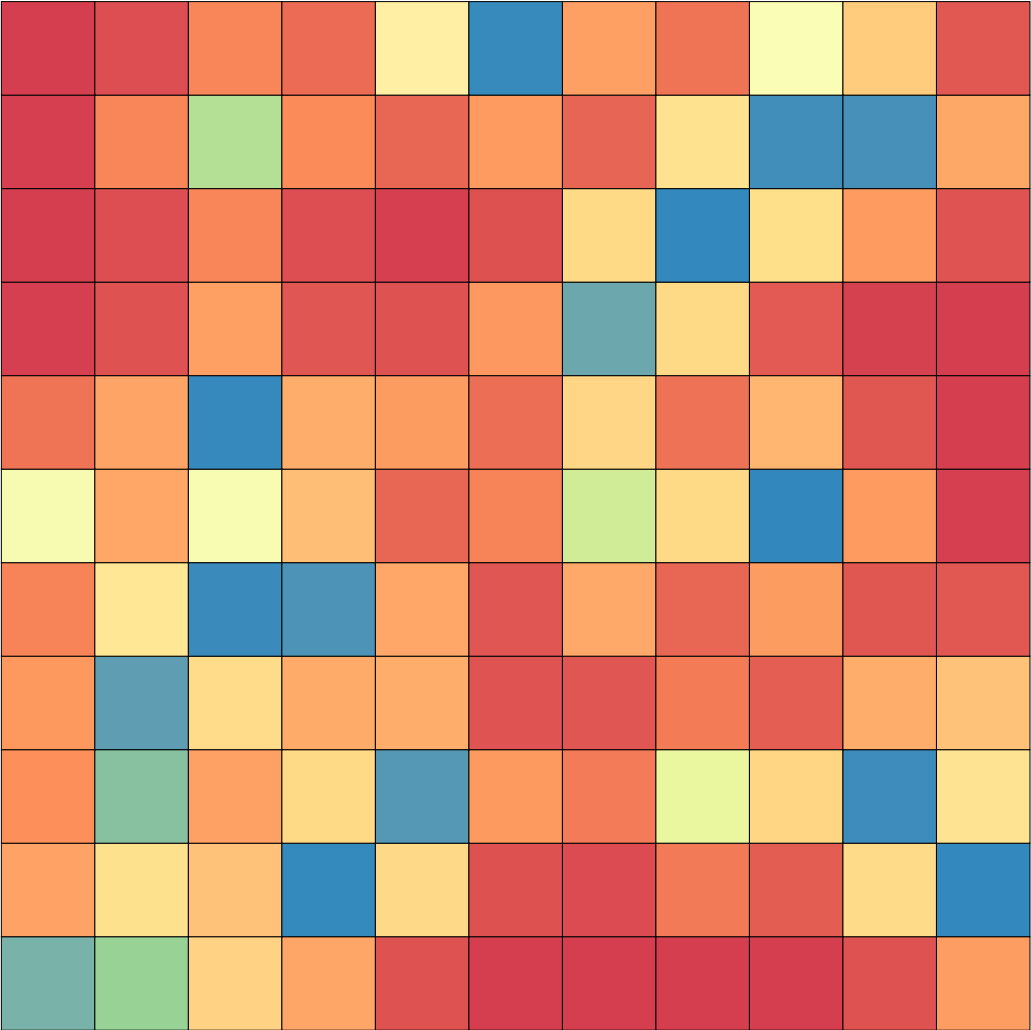

Revealed (t=30)

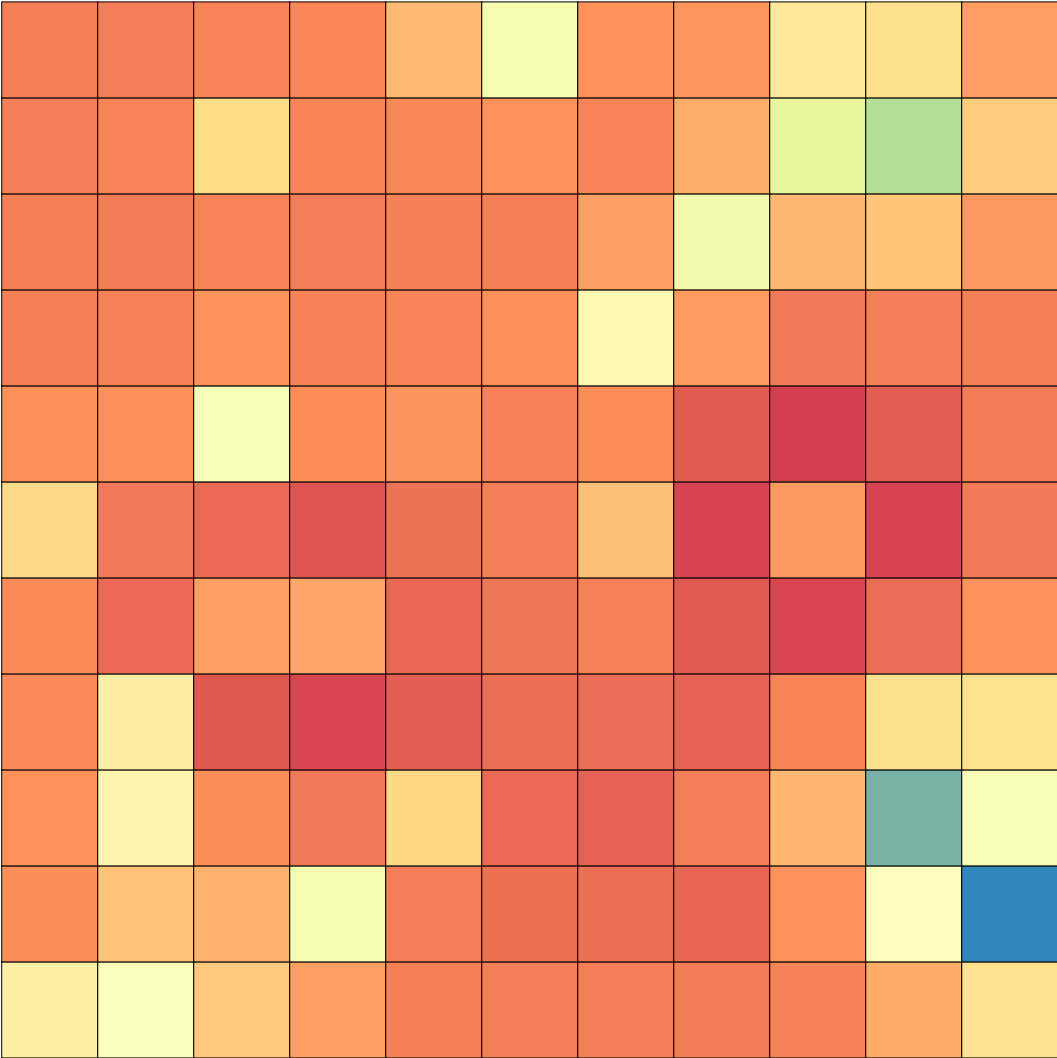

The image displays a 12x12 grid with a color gradient. The colors range from light yellow (low intensity) to dark blue (high intensity). The highest intensity is located at the center of the grid (row 6, column 6), where the color is dark blue. The intensity decreases as the distance from the center increases, following a radial pattern. The colors transition through green and yellow as they move towards the edges of the grid.
